Chip-wet vacuum cleaners– 230/400 Volt – Pressure discharge

Powerful chip extractor with pressure discharge

For **vacuuming and separating** solid material / swarf and liquids / emulsions.

Comfortable evacuation via dump hose with ball valve (no pump).

By **reversing the thrust**, the liquid is pressed outwards and the chips are freed from liquid.

Coolants can thus be recycled. Easily accessible chip basket.

Including **oil-resistant drain hose**, length 2 m, with ball valve for pressure drainage.

Innovative **electronic fill-level sensor (patented)** shuts down the engine when the liquid reaches maximum level.

Sturdy, smooth running chassis for high mobility. Compact modular structure with high-quality stainless steel dirt container (**V2A**).

Liquid repellent cartridge filter avoids the sucking of oil mist or dust.

Length connection cable: 8 m

EP1236: Pressure release by thrust reversal. The liquid is pressed outwards via thrust reversal.

EP2230-2255: Discharge by powerful pump.

Direct start-up (optionally available with star-delta soft start 054-6935).
